Ufd122. Little Grimsditch Wood (3.8 ha) TL 551403

Little information is available for this ancient wood. The canopy appears to be dominated by Ash (*Fraxinus excelsior*) and Pedunculate Oak (*Quercus robur*), with Blackthorn (*Prunus spinosa*) in the understorey. The flora is likely to be similar to the adjacent Grimsditch Wood.

Date of selection/last revision: 1994
