Ufd229. Haylock's Fen (0.1 ha) TL 615383

This very small but remarkable site is a calcareous fen community situated on a water seepage point within the slope of an arable field. Characteristic plants are Greater Pond-sedge (*Carex riparia*), Meadowsweet (*Filipendula ulmaria*), Marsh Marigold (*Caltha palustris*), Great Willowherb (*Epilobium hirsutum*), Ragged Robin (*Lychnis flos-cuculi*) and Water Mint (*Mentha aquatica*).

Date of selection/last revision: 1994
