**Ufd44. Beaver's Wood (1.9 ha) TL 487381**

The conservation value of this Pedunculate Oak (*Quercus robur*)/Ash (*Fraxinus excelsior*)/Hazel (*Corylus avellana*) ancient woodland is currently reduced following clear felling and unsuccessful restocking and is now awaiting replanting under an approved forestry scheme. The grassy ground flora still contains many typical woodland species which will flourish once a tree canopy is re-established.

Date of selection/last revision: 1994
