Ufd45. Ann's Wood (4.0 ha) TL 487394

The conservation value of this Pedunculate Oak (*Quercus robur*)/ Ash (*Fraxinus excelsior*)/Hazel (*Corylus avellana*) ancient woodland is currently reduced following clear felling and unsuccessful restocking and is now awaiting replanting under an approved forestry scheme. The flora, though rather grassy at present, still contains many woodland species including Dog's Mercury (*Mercurialis perennis*) and Bluebell (*Hyacinthoides non-scripta*).

Date of selection/last revision: 1994
